Why is placement training important

Placement training plays a major role in shaping up the career goals of students. It is the dream of every engineering student to get placed in a top organization visiting their campus for recruitment. Keeping this key aspect into consideration, it is realized that training is important for engineering students to enhance their employability skills and achieve good placement in various Industries.

At present, the competition for employment is increasing every day and placement has become a challenging task. Training students and equipping them with life skills has become an important responsibility of the institution. Along with technical expertise, the development of a holistic personality is also necessary.

Testimonials

> Yourname's ongoing assistance has certainly been of significant and direct benefit to us in terms of User Experience as well as website functionality and integration with our internal systems. More than the efficient delivery of tasks/projects and rapid response to any issues encountered, we have found Rowan's consultative approach invaluable. His up-to-date knowledge and experience combined with a focus on understanding exactly what we are wanting to achieve (and why), has frequently lead to outcomes that we hadn't realised were possible and that exceed our expectations. Yourname would be a valuable asset to any business.
